

Vanderbilt Women's Heart Symposium

The Vanderbilt Women's Heart Symposium provides a case-based educational program to strengthen clinical knowledge of cardiovascular care for female patients across their life course. Expert faculty from the multi-disciplinary Vanderbilt Women's Heart Center will discuss key issues in the care of post-menopausal and pregnant patients, including:

- Hormone replacement therapy
- Care of the geriatric female patient
- Stroke prevention in women
- Guidelines for diagnosis/management of chest pain in women
- Cardiovascular risk stratification in pregnant patients
- Delivery planning for patients with cardiovascular disease
- Anesthetic care for pregnant patients with heart disease

This event is well-suited for physicians, advanced practice practitioner and nurses.

It has been approved for 3.75 AMA PRA category 1 credits.

December 9, 2023 | 8:00 a.m. – 12:00 p.m.
